- Replacement high level third brake light camera with fixed cable to 4 pin connector
- 10m cable with 4 pin to RCA connector plus DC Power
- Instructions

INSTALLATION

1. Remove and disconnect the factory fitted third brake light from the vehicle.
2. Connect the brake light factory plug to the CAM-FT3 and check for correct function of the third brake light.
3. Connect the Black wire to a suitable ground and connect the Red wire to the reversing light circuit or an interface which provides a reverse signal.
4. Connect the camera to the 4pin extension cable and connect the extension cable to the display screen via the Yellow RCA connector.
5. Test and ensure that the image is displayed correctly on the monitor.
6. Finally, fit the camera/brake light assembly into the aperture left by the removal of the factory brake light.
