- Camera with 3m Cable to Male 2.5mm Connector
- 11m Camera Connection Cable with Female 2.5mm Connector to RCA Male Connector, Fused Power Wire and Ground Wire.
- 2x Extension Bolts
- 1x Camera Adjusting Tool
- Instructions

INSTALLATION

1. Remove the third brake light from the vehicle and disconnect it.
2. Attach the 2x extension bolts to the nuts fixed to the vehicle which originally held the third brake light screws.
3. Insert the third brake light into the camera, reconnect the power loom and refit to the vehicle taking care not to trap any cables.
4. Connect the camera to the camera connection cable.
5. Connect the Black wire to a suitable ground and connect the Red wire to the reversing light circuit or an interface which provides a reverse signal.
6. Connect the RCA Male connector to the display monitor and ensure that the image is displayed correctly.
7. If adjustment of the camera is needed, insert the adjusting tool into the 2 holes on the camera and move to the desired position.
